

HEALTHAPP AUTOMATION

DOCTOR MODULE-PL1

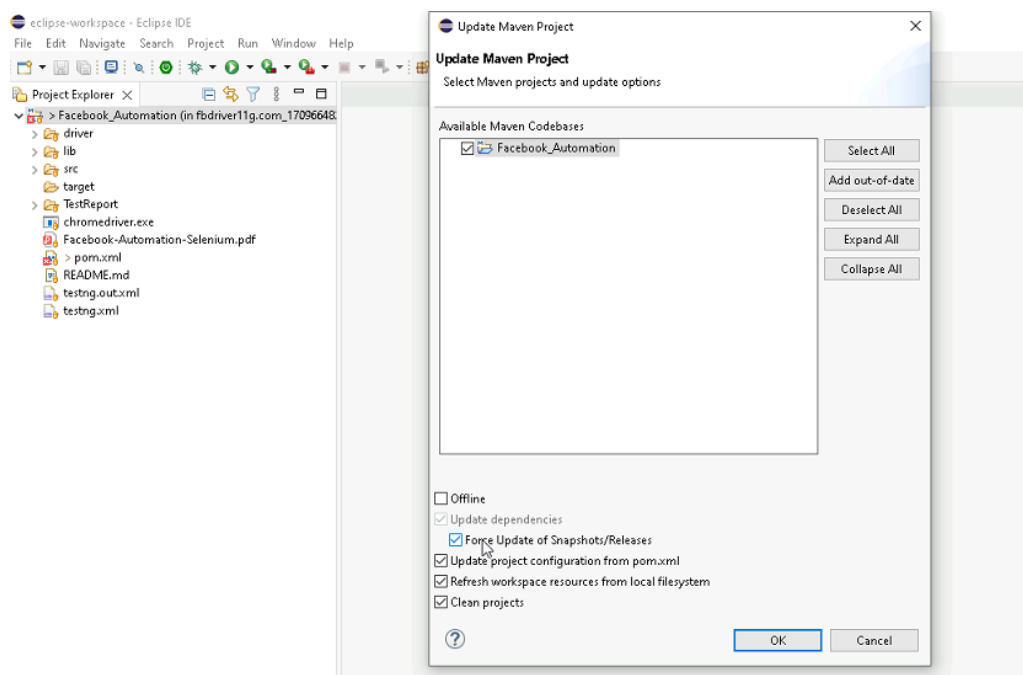

Pre-requisite:

As soon as you import project in eclipse, update the project using maven update option as below. This is to resolve issue if any maven dependency not downloaded properly:

1. Right click on project : Go to “Maven” : Select “Update Project”

2. In Update Maven Project Box Select “Force Update of Snapshots/Releases” and click OK

Template Code Structure:

- a. Below are the packages and files you will be required to work on.
- b. Other Files and packages you can ignore.
- c. In other Files and packages do not make any changes. It would affect your evaluation.
- d. You are not required to work in the "Test" Folder. Files there are non-editable. Editing those files and trying to save them will throw errors and would affect your evaluation.

Package	Class/File	Description
/src/main/java/pages	doctor_Pages.java	<ol style="list-style-type: none">1. All core activities (mentioned in list above) to be performed here.2. The comments associated with each templated method here describe the expectation.3. You can define locators and xpath here.4. Declare any variable/object you need to share data/status between different methods.5. Do not modify the signature of methods declared here.6. You can create additional supportive common methods in CommonEvents class.
/src/main/resources/	Config.xlsx	URL to navigate to. Already URL is defined here
	expected_data.xlsx	Contains data to fill in form
/src/main/java/coreUtilities/utls	CommonEvents.java	<ol style="list-style-type: none">1. Contains all common activities.2. Certain templated common method declared here.3. You implement them as per your need.4. You can add any additional method for common activity here
	Testng.xml	Execution needs to kick started from TestNG xml

PROBLEM STATEMENT

Need to automate the following activities using Selenium + Java.

Key Activities to implement:

SI No.	Summary	Action	Expected Result
1	* Navigate to the URL. * Retrieve Title and URL of the current page. * Verify Title & URL: Check if the title & URL matches the expected title.	1. Go to url : https://healthapp.yaksha.com/ 2. login as valid credential (username : admin , password : pass123) and click on "SignIn" Button 3. get the title and url of the Home page, post login 4. validate the title and url of the Home page	Title should be : DanpheHealth Url should be : https://healthapp.yaksha.com/Home/Index#/
2	Verify that Doctor module is present or not ? If Present, then expand the Doctor module and verify all presence of sub modules under the Doctor module.	1. User must be login the health app 2. verify that, Doctor Module is present or not in left navigation 3. if Doctor Module is present, then Click on the expand icon of the Doctor Module 4. then verify the following sub module under the Doctor Module Sub modules are : Out patient , In patient department , Patient Record	Doctor Module should be present in left navigation All sub-modules should be displayed correctly. Expected Sub modules are : Out patient , In patient department , Patient Record
3	On the Doctor Module's "Out Patient" Sub module, select the "Show Doctor Wise Patient List" check box and verify that is "Show Doctor Wise Patient List" check box is selected or not? After validation, uncheck the "Show Doctor Wise Patient List" check box.	1. User must be present on "Out Patient" Sub module of "Doctor" Module. 2. verify the "Show Doctor Wise Patient List" check box is present or not ? 3. If Present, then click on the "Show Doctor Wise Patient List" check box 4. Verify the "Show Doctor Wise Patient List" check box is selected or not 5. After validation, then uncheck the "Show Doctor Wise Patient List" checkbox	Show Doctor Wise Patient List' checkbox should be check & uncheck
4	On the Doctor Module's "In Patient Department" Sub-Module, verify that "Department filter" dropdown is Present. If present, then select the "NEUROSURGERY" from the "Department filter" dropdown and validate "NEUROSURGERY" is selected or not?	1. User must be present on "Out Patient" Sub module of "Doctor" Module 2. then click on the "In Patient Department" Sub-Module 3. Verify that the "Department filter" dropdown is Present. 4. If present, select the "NEUROSURGERY" from the "Department filter" dropdown 5. validate that "NEUROSURGERY" is selected or not	"Department filter" dropdown should be present. "NEUROSURGERY" should be selected from "Department filter" dropdown

5	On the Doctor Module's " In Patient Department " Sub-Module, verify that " My Favorites " and " Pending List " buttons are present inside the "In Patient Department" Page	1. User must be present on " In Patient Department " Sub-Module of "Doctor" Module 1. then Verify " My Favorites " and " Pending List " buttons are present or not in "In Patient Department" Sub-Module	"My Favorites" and "Pending List" buttons should be present.
6	On the Doctor Module's "In Patient Department" Sub-Module, clicking on "Pending List" buttons and it opens pending table record. Then click on "Show Details" from the first table record and it open the "Free Text Template" form. Then validate the title name of the "Free Text Template" form	1. User must be present on " In Patient Department " Sub-Module of "Doctor" Module 2. click on "Pending List" buttons and it open the pending record table 3. then click on "Show Details" from the first table record and it open the "Free Text Template" form 4. then validate the title name of the "Free Text Template" form 5. then close the "Free Text Template" form 6. click on "Pending List" buttons , then it close the pending record table	title name of the "Free Text Template" form should be Free Text Template
7	On the Doctor Module's "In Patient Department" Sub-Module, a table record pre display which is filter by department as "NEUROSURGERY". Then get the "Doctor Name" where the "Hospital Number" is "2312000010". Then Validate the Doctor Name is Dr. Amit Shah	On the Doctor Module's "In Patient Department" Sub-Module, Patient record table must be display which is filter by department as "NEUROSURGERY". 2. then retrieve the "Doctor Name" where the "Hospital Number" is "2312000010" from the table 3. then validate the Doctor Name	Doctor Name should be Dr. Amit Shah
8	On the "Surgical History" Menu Tab of Problem module of the Profile "Sonia Gandhi", clicking on the "+Add New" button from Surgical History List and it will open a " Add Surgical History " form. Then click on "Add" button of "Add Surgical History" form directly without filling any information, it will throw an error message in " Search Problem* " field. Then Validate that Error Message : Select ICD-11 Code	1. user must be on "In Patient Department" Sub-Module and Patient record table must be display which is filter by department as "NEUROSURGERY". 2. click on the preview icon from the table where "Hospital Number" is "2312000010" and it will navigate to the IPD page of patient "Sonia Gandhi" 3. then click on the problem module from left navigation 4. "Active Problem" Tab must be pre selected 5. then click on "Surgical History" 6. then click on "+Add New" button from Surgical History List and it will open a "Add Surgical History" form. 7. Then click on "Add" button of "Add Surgical History" form directly without filling any information and it will throw an error message in "Search Problem*" field. 8. Then Validate that Error Message : Select ICD-11 Code	Error Message should be "Primary Phone is required"

NOTE: "Please do not delete any file in the src folder. But you are free to add any other file".

Expectations:

- 1) Learners should write automation script using Java and selenium to automate all the steps in the above question. In other words, automation script should perform all mentioned steps.
- 2) Learners should not use any tools to create the xpath. They should develop the xpath/cssselector on their own.

IMPLEMENTATION/FUNCTIONAL REQUIREMENT

1.1 CODE QUALITY/OPTIMIZATIONS

1. Associates should have written clean code that is readable.
2. Associates need to follow SOLID programming principles.

EXECUTION STEPS TO FOLLOW

1. **You are mandatory required to run test cases for applications before final submission. Without which project evaluation will not happen.**
2. **You can launch test cases any time as follows: Right click on testng.xml and run TestNGSuite.**

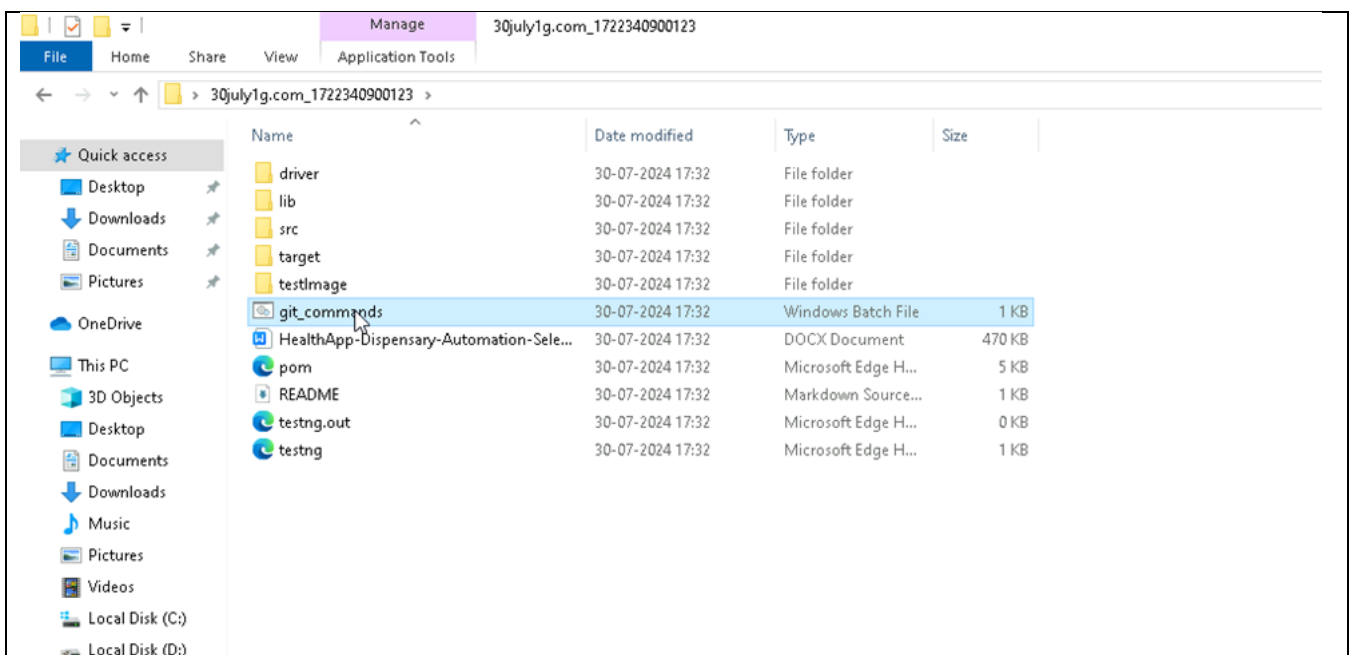

3. **Before final submission, you are also required to push your code to GIT. Following are**

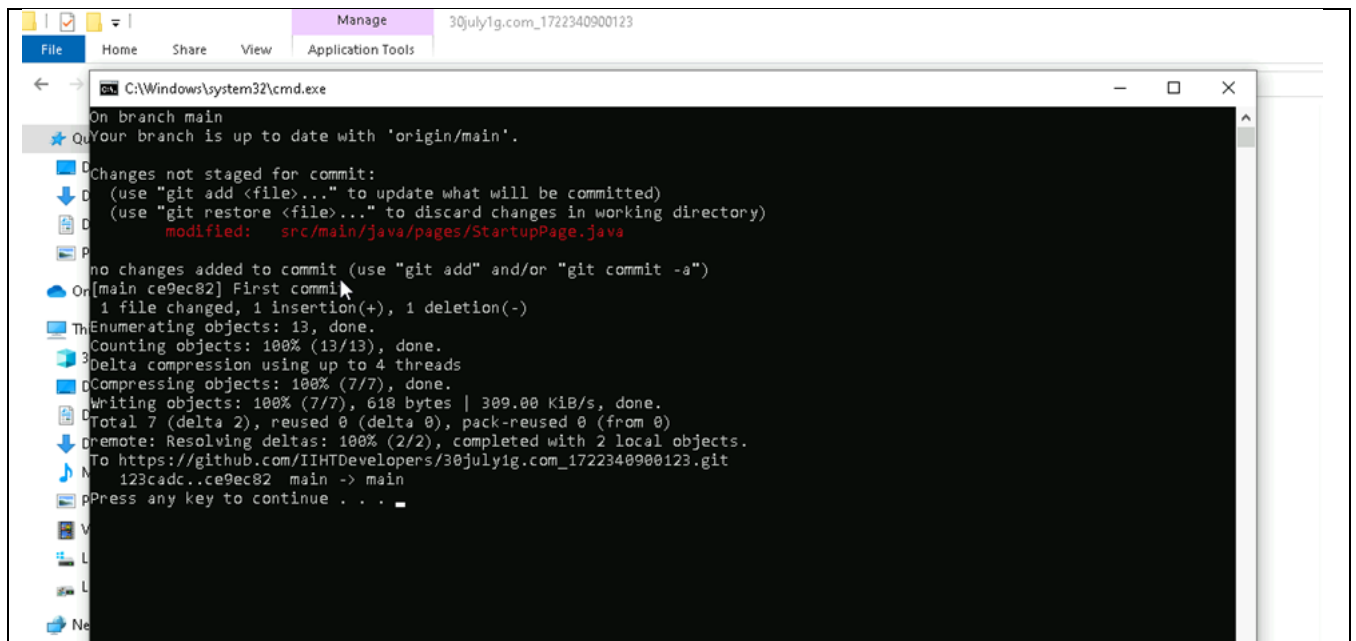

the steps to follow:

In your project folder, you will find a batch file named git_commands

Double-click the batch file to run it. It will run the commands to push your code to GIT.

=====

All the Best
